**Session plan. MBT and landfilling**

Session Chair Anders Lagerkvist

**Aim of session**

To identify relevent research and development tasks on the theme of MBT and landfilling.

**Research questions and schedule**

Intro 10 minutes: AL

Alternative treatments:

Brief presentations of different treatments, each outlining:

- How the treatment is done
- What is the impact on treated waste
- What are the resources needed per ton of waste
- What are the environmental impacts of the treatment

For each treatment about 6 slides and 10 minutes, 3 presentations, about 30 minutes in all.

Discussion 30 minutes; What are the development issues to be prioritized?

Landfill impacts:

Brief presentations on:

- Gas emissions
- Mechanical stability
- Hydrology
- Consequences for landfill closure and post operation use of sites.

Altogether about 30 minutes presentations

Discussion about 30 minutes What are the development issues to be prioritized?

Summary discussion: What are the development issues to be prioritized and what can we do about it? Is there a need for an IWWG working group on this, or a review paper? Who can do what?
