

UTILIZATION OF ASHES IN LANDFILL CONSTRUCTIONS

The 3rd Intercontinental Landfill Research Symposium
Toya, Hokkaido, Japan, 2004

Presentations:

- ④ Utilization of ashes in a landfill cover system (Gustav Tham, Anna Mellström)
- ④ Maturation processes in ash covers (Rolf Sjöblom)
- ④ Air permeability of incineration ash (Toshihiko Matsuto)

Questions:

- Long-term consolidation of ashes in (landfill) constructions - Processes and time span?
- Will there be a “final stabilization”? When?
- Further research needs?

Please,

Talk loud and clear!
