

# Call for Papers and Posters Fourth Intercontinental Landfill Research Symposium

Gällivare (Lapland) Sweden  
June 14 - 16, 2006

A symposium focused on landfill research will be held in Gällivare, Sweden in June 2006. Our objectives are to assemble the worlds leading researchers and practitioners on a broad range of topics related to landfills and to engage in discussion and debate regarding current knowledge and future directions. Overall attendance at this symposium will be limited to 120 people to encourage focused discussion in a casual setting. At this time, we are pleased to solicit abstracts. Given the emphasis on discussion, there will be a very limited number of oral presentations with significant emphasis on posters. All authors will be required to present a poster.

Future information regarding the symposium will be distributed by the world wide web at <http://lst.sb.luth.se/iclrs/web/symposia.html>.

## Suggested Topics for presentations include but not limited to:

- Ash Management
- Alternative Landfill Designs
- Bioreactor Technology
- Landfill Gas Emissions
- Life-Cycle Analysis
- Landfill Stability & Long-Term Management
- Mechanical & Biological Pretreatment
- Methane Oxidation
- Physical, Chemical and Biological Processes in Landfill
- Process Modeling
- Research Needs
- Solids Decomposition

## Abstract Submittal

Abstracts should contain a concise summary of the proposed presentation and are limited to 2 pages. Abstracts should be submitted by electronic mail as a Word or pdf file. Submit to Morton Barlaz – [barlaz@eos.ncsu.edu](mailto:barlaz@eos.ncsu.edu)

The front page of the abstract should contain complete contact information for the corresponding author including a mailing address, an email address and phone and fax numbers.

Abstracts Due: **January 3, 2006**

## Conference Board

Dr. Morton Barlaz, North Carolina State University, USA  
Dr. Anders Lagerkvist, Luleå University of Technology, Sweden  
Dr. Toshihiko Matsuto, Hokkaido University, Japan
